### Ventilated biowaste container 140 litres

- Recommended by Rosk'n Roll for detached and semi-detached houses, also suitable as a shared container for two homes.
- Biowaste must always be packed in a paper bag and users must make sure the waste is not too moist.
- The most economical option with a four-week emptying interval.
- No liner is used in this waste container.

### Regular biowaste container 140 litres / 240 litres

- 140 litres: recommended as a shared container for 3–4 homes, also suitable for detached houses and as a shared container for two homes
- 240 litres: recommended as a shared container for 5–9 homes
- Emptied
  - once every two weeks all year round if used by 1–4 homes
  - once a week during the summer season and once every two weeks during the winter season if used by more than four homes.
- Various options for packing the biowaste (biodegradable bag, paper bag, carton packaging, newspaper, etc.).
- Liner is used in this waste container.

### Compostor

- The compostor must be thermally insulated and protected against animals.
- A composting notification must be submitted to the waste management authority in Uusimaa.
- The composting notification can be submitted online at [www.ujlk.fi](http://www.ujlk.fi). You can also ask for a paper form from the waste management authority by emailing [ujlk@ujlk.fi](mailto:ujlk@ujlk.fi) or by calling 020 690 145.
